

Dogoo Chat

Description

Dogoo Chat is a very basic desktop app that allows real-time messaging between clients with a fun, engaging UI.

Tech Stack

- Electron - desktop app framework for cross-platform apps
- Sockets.IO - real-time messaging between clients
- HTML, CSS, JS - frontend
- Tailwind CSS - utility-based CSS framework to make styling faster
- Daisy UI - tailwind plugin providing prebuilt UI components

Features

Feature 1 - Real-time message between clients using Sockets

Feature 2 - Usernames / User-identification (e.g., CunninGorgi, NihonChin, etc.)

Feature 3 - Detect and modify activity status

Feature 4 - Allow images to be sent in messages

Feature 5 - Display data of message sent
